

Gold Standard Examples for Discussion Guide

Sample 1 — StayNow — Discussion Guide

Discussion Guide – Formative Research Last Updated: November 3, 2020 Discussion Guide: Formative Research – Guest Experience Study: StayNow - Online Travel Booking Platform Duration: 60 minutes Methodology: Moderated Remote Interview (Interview + Simulated Booking)

1. Introduction & Consent [~5 min] Hello, [Participant Name]! How are you? Thank you for participating in our study. I'm Jamie, and I'm a researcher who is part of a team designing a booking platform. We wanted to have this conversation with you to better understand your experience as someone who books and stays in hotels. I have a colleague on the call with me today as well — they will be taking notes in the background so I can stay focused on our conversation. The purpose of this session is to learn what you enjoy and what needs to be improved about your hotel experience from the moment you book until you check out. We'll ask you to go through a simulated booking exercise before we discuss your personal experience. We'll also try to learn about what an ideal booking experience looks like to you. There are no right or wrong answers — we're here to learn from your real experiences. Everything you share will be anonymous, and any attribution will never be shared outside the team involved with this project. We record all sessions for internal note-taking purposes only. Do you have any questions before we begin? Shall I start the recording now? [Start recording]

2. Participant Background / Warm-Up [~8 min] I would like to start off learning a little more about you.

- Could you share a little about where you're from and what you do for a living?
- Who, if anyone, do you typically travel with?
- In your screener, you mentioned that you use online booking platforms like [Expedia]. Tell me a bit about how you typically use them.
- Did you use or consider any similar booking services?
- [If yes] Why did you choose [Expedia]?
- [If no] If there were similar services, what do you think could make you choose one over the other?
- How did you learn about those booking services?

3. Core Discussion [Part 1] Simulated Booking [~12 min] Thank you for sharing. Now I want to dive into our first exercise — a simulated booking. I'll be asking you to share your screen, so feel free to clear anything you don't wish me to see. Could you go into [booking.com/expedia/kayak], and let's pretend that you want to book a birthday weekend with your [best friend/significant other] in Napa Valley for the first week of December. You don't actually have to book anything, but could you show us how you would find and decide on a place to stay? Please talk out loud and describe what you're doing on the screen as you go. Observe and note:

- What tools the person uses to find the hotel
- How they are filtering information
- What criteria they use to filter
- Why they choose that hotel over others
- Common frustrations they mention across different booking services

Thank you for going through that exercise with us. You can stop sharing

your screen now. Based on what you've just shown me, I'd love to talk more about your past experiences with booking... [Part 2] Past Booking Experience [~12 min] You mentioned in the questionnaire that you stayed at [Casa Murnas]. Could you share about why you were traveling and what your experience was like? • What was the purpose of your trip? ◦ Did you travel with anyone else? If so, who? • How did you start your search for a place to stay? ◦ What information did you need to know before selecting a hotel? ◦ How did you decide that this was the hotel you wanted to book? ■ Price ■ Perks ■ Location ■ Aesthetic ■ Facilities ■ Recommendation ◦ Where did you find the information you needed to make a decision? For example, hotel websites, review sites, etc. ◦ Did you use social media to look up information about hotels? ◦ Did you look at ratings before booking? • Why did you choose to stay at [Casa Murnas] over some hotel chains like Marriott, Hyatt, etc.? • Between the time you booked and when you checked in, was there anything about your reservation you needed to change? ◦ If so, what did you change and why? ◦ What steps did you need to take to make the change? ◦ If not, have you ever had to revise a hotel reservation? • Tell me about when you typically submit payment information. ◦ When do you feel like you should provide your payment details? ◦ Have you ever used crypto to make a purchase? ◦ Would you consider booking a hotel with crypto? Why or why not? ◦ Of the different payment methods available now, which do you feel are trustworthy and why? ◦ What makes a payment method not trustworthy, if any? Thank you for explaining how you search for and book hotels. Based on what you've shared, I'd love to learn more about your experience staying at [Casa Murnas]... [Part 3] Stay Experience [~12 min] Could you walk me through what your stay was like from when you arrived at the hotel through the remainder of your stay? ◦ Arrival and check-in ◦ The room ◦ The hotel facilities ◦ Location ◦ Perks • What do you think could be improved during your stay? • Besides the experience you had at [Casa Murnas], tell me about other independent hotels (small hotels not owned by larger companies) that were great or not so great. ◦ What made it a good or bad experience? ◦ What made it enjoyable or less enjoyable? ◦ What were the best perks? ◦ What was the most negative experience? Based on what you've shared about your stay, I'd love to understand how your trip wrapped up... [Part 4] Checkout and Post-Stay Experience [~8 min] I'd like to learn more about your check-out experience and how you wrapped up your trip. • What was the checkout process like? ◦ Do you have any feedback on the experience of checking out? • Based on your experience with this hotel, did you do anything to share your experience with others after your trip — like writing a review, posting on social media, or recommending the hotel to your friends? I wanted to touch on one last topic with you before we wrap up... You mentioned in the questionnaire that you are a part of [...], could you share a little more context with me on when you joined the program and why? • For how long have you been part of this program? • Why did you decide to be part of this program? ◦ Perks ◦ Discounts ◦ Others • Which benefits do you enjoy from your loyalty

program? • Which perks are you looking for on a loyalty platform? • When do you use your loyalty program? 4. Wrap-Up [~5 min] • Are there any aspects of your journey that you would change in booking an independent hotel after explaining it to us? • What would your ideal experience look like? • Do you think there is something preventing guests from staying in an independent hotel? Thank you so much for your time and insights today. Your feedback is incredibly valuable as we continue our work. We will be wrapping up this study by _____. You should be receiving compensation by then.

Sample 2 — StayNow — Discussion Guide

Discussion Guide – Concept Testing Last Updated: February 22, 2021 Discussion Guide: Concept Testing – Guest Experience Study: StayNow - Online Travel Booking Platform Duration: 45 minutes Methodology: Moderated Concept Testing (Concept Design Prototype) 1. Introduction & Consent [~3 min] Hi, [Participant Name]! How are you today? Thank you so much for participating in our study. My name is [Carla] and I'm a researcher currently working with a design team to create a platform similar to [Expedia, Booking.com]. You said on your screener that you have used this platform before, right? These platforms are called online travel agencies, or OTAs — so if you see this phrase later in the study, we're referring to these types of platforms. I have a colleague on the call with me today as well — they will be taking notes in the background so I can stay focused on our conversation. In today's 45-minute session, you will provide feedback on early design concepts for a mobile application we created. These are early-stage designs so they don't have all the details, not every part is clickable, but we did give it basic functionality. The prototype you will see is in grayscale — what we call a wireframe in UX design. There are no right or wrong answers — we're here to learn from your real experiences. Everything you share will be anonymous. Please try to express your thoughts and feelings out loud as much as possible during the session. We record all sessions for internal note-taking purposes only. Do you have any questions before we begin? Shall I start the recording now? [Start recording] 2. Participant Background / Warm-Up [~2 min] Scenario: Let's assume your name is Alex. You are traveling to Monterey CA with 3 other friends. The app is already installed on your phone and will help you plan and make the necessary arrangements for this trip. • Before we dive in, tell me a bit about how you typically book hotels when you travel. • What platforms have you used most recently? • What do you usually look for first when comparing options? 3. Core Discussion – Tasks #1 Sign Up and Explore Monterey Page [~8 min] Create an account and show me how you would find and

save a hotel in Monterey, California for yourself and three friends from March 12–16 near San Carlos Beach. Do not book anything yet, only save the hotel for later. • What are you thinking as you view the first page of the app? • (wishlist) Is this experience the same or different from what you expected? Why? • Is there any information that you need to see or would like to see that isn't included? • How did you feel about the overall flow of steps? • What do you think could be done to improve the experience? Metrics (1 = strongly disagree, 7 = strongly agree): • What I just saw is understandable • What I just saw is valuable • What I just saw is trustworthy • What I just saw will help me to make faster decisions • I am satisfied with what I just saw • Performing the task was intuitive Based on what you've shared about searching and saving, let's move to collaborating with your friends on a decision... #2 Collaboration [~6 min] Let's say you've already saved a few hotels that you like to your wishlist, and you would like your friends to help you choose just one. Show me how you would collaborate with your friends to pick a hotel. • Is this experience the same or different from what you expected? Why? • How did you feel about the overall flow of steps? • What do you think could be done to make the experience work better for you? Metrics (1 = strongly disagree, 7 = strongly agree): • What I just saw is understandable • What I just saw is valuable • What I just saw is trustworthy • What I just saw will help me to make faster decisions • I am satisfied with what I just saw • Performing the task was intuitive Based on what you've shared about collaborating, let's go ahead and book the hotel you and your friends agreed on... #3 Payments [~4 min] You and your friends have agreed on the Cannery Row Inn. Please show me how you would book it. • What do you think of the different payment options available in the app? • How did you feel about the overall flow of steps? • What do you think could be done to make the experience work better for you? Metrics (1 = strongly disagree, 7 = strongly agree): • What I just saw is understandable • What I just saw is valuable • What I just saw is trustworthy • What I just saw will help me to make faster decisions • I am satisfied with what I just saw • Performing the task was intuitive Based on what you've shared about booking, let's fast-forward to just before your trip... #4 Self Check-in [~4 min] Imagine we are two days away from your trip to Monterey. A message (which you should see on your screen) appears on your phone. Can you show me what you would do next? • Can you tell me what just happened? • What do you think pre-check-in is? • Is this something you see yourself using? Why or why not? • How did you feel about the overall flow of steps? • What do you think could be done to make the experience work better for you? Metrics (1 = strongly disagree, 7 = strongly agree): • What I just saw is understandable • What I just saw is valuable • What I just saw is trustworthy • What I just saw help me to make decisions faster • I am satisfied with what I just saw • Performing the task is intuitive Based on what you've shared about the pre-trip experience, let's fast-forward to after your stay... #5 Feedback: Effectiveness of Incentives [~4 min] Now fast forward to after your trip. A few days have passed, and you receive the

message that you see on your screen. Assuming you had a great trip, could you show me what you would do next? • How did you feel about the overall flow of steps? • What do you think could be done to make it easier for people to leave feedback? Metrics (1 = strongly disagree, 7 = strongly agree): • What I just saw is understandable • What I just saw is valuable • What I just saw is trustworthy • What I just saw help me to make decisions faster • I am satisfied with what I just saw • Performing the task is intuitive 4. Wrap-Up [~2 min] Two more questions about your overall experience: • What do you think this app does differently than other similar apps you have used for booking hotels? • What do you think of the Monterey section of the app? Does it provide value to you? Thank you so much for answering all those questions. That's all I have for today. Is there anything you'd like to add that we didn't cover? Do you have any questions before we wrap up? We will be wrapping up the study soon and will be processing incentives in 1–2 weeks.

Sample 3 — StayNow — Discussion Guide

Discussion Guide – Summative Research Last Updated: Jul 19, 2022 Discussion Guide: Summative Research – Guest Experience Study: StayNow - Online Travel Booking Platform Duration: 45 minutes Methodology: Moderated Usability Test (Design Prototype - Mobile) 1. Introduction & Consent [~3 min] Hi, [Participant Name]! How are you today? Thank you so much for participating in our study. My name is [Suzanne] and I'm a researcher currently working with a design team creating the next generation online travel booking platform. I have a colleague on the call with me today as well — they will be taking notes in the background so I can stay focused on our conversation. You said on your screener that you have used similar platforms before, right? Can you name some of the platforms you have previously used? These platforms are called online travel agencies — so if you see this phrase later in the study, we're referring to these types of platforms. There are no right or wrong answers — we're here to learn from your real experiences, and we want to know if this product would fit your expectations and needs. Everything you share will be anonymous. Also please remember to turn off your notifications as we are going to see your screen. We record all sessions for internal note-taking purposes only. Do you have any questions before we begin? Shall I start the recording now? [Start recording] Have you participated in a session like this before? A few details about today's exercise: • These are early-stage designs so they won't have all the details or be fully interactive, but have basic functionality. The prototype is in grayscale and does not include any styling, color, or graphics. • I'll provide four tasks for you to complete in the prototype and may ask a few additional questions to get a better understanding of your thoughts afterwards. • Please try

to express your thoughts and feelings out loud as much as possible as you complete the tasks.

2. Participant Background / Warm-Up [~2 min] Scenario: Let's assume your name is Bella. You already have a hotel booked to travel to Monterey CA with 3 other friends, and you will be booking your accommodations through this app installed on your phone. • Before we dive in, tell me a little about how you typically plan trips and book hotels. • What platforms have you used most recently?

3. Core Discussion – Tasks #1 Manage Profile [~8 min] You have an existing account which you haven't used in a while, so you want to update your personal details and customize your preferences. Please show me how you would check your profile to update your email, payment methods and preferences. Follow-up questions: • What are your initial thoughts on what you're seeing? Any questions? • Is this experience aligned with or different from what you expected? Why? • Is there any information that you need to see or would like to see that isn't included? • How would you describe your experience with the flow of steps throughout the process? • Are there any specific steps you found unnecessary or would rather not go through? If yes, which ones and why? • Is there anything you would have liked to change about the experience? • In your opinion, how efficient was the overall process? Metrics (1 = strongly disagree, 7 = strongly agree): • What I just saw is understandable • What I just saw is valuable • What I just saw is trustworthy • What I just saw will help me to make faster decisions • I am satisfied with what I just saw • Performing the task was intuitive Based on what you've shared about managing your profile, let's move on to updating a reservation...

#2 Manage Reservation [~6 min] You have booked a hotel room for a staycation with your friends, but you want to update the room from a deluxe room to a suite room. Please update your booking by changing the room type and make the payment for the price difference. Follow-up questions: • What do you think "wishlist" is? • Is there any information that you need to see or would like to see that isn't included? • Is this experience the same or different from what you expected? Why? • How would you describe your experience with the flow of steps throughout the process? • Are there any specific steps you found unnecessary or would rather not go through? If yes, which ones and why? • Is there anything you would have liked to change about the experience? • In your opinion, how efficient was the overall process? • What do you think could be done to make the process work better for you? Metrics (1 = strongly disagree, 7 = strongly agree): • What I just saw is understandable • What I just saw is valuable • What I just saw is trustworthy • What I just saw will help me to make faster decisions • I am satisfied with what I just saw • Performing the task was intuitive Based on what you've shared about managing your reservation, let's look at your membership and reward points...

#3 Manage Membership and Reward Points [~4 min] You've been making most of your reservations on this platform over the last few months and earned some reward points. You want to know your membership status and reward point balance, so you know what additional perks you're likely to get for your Monterey trip.

Can you let me know if you have early check-in? Follow-up questions: • Is there any information that you need to see or would like to see that isn't included? • Is this experience the same or different from what you expected? Why? • How would you describe your experience with the flow of steps throughout the process? • Are there any specific steps you found unnecessary or would rather not go through? • Is there anything you would have liked to change about the experience? • In your opinion, how efficient was the overall process? • What do you think could be done to make the process work better for you? Metrics (1 = strongly disagree, 7 = strongly agree): • What I just saw is understandable • What I just saw is valuable • What I just saw is trustworthy • What I just saw will help me to make faster decisions • I am satisfied with what I just saw • Performing the task was intuitive Based on what you've shared about membership, let's take a look at your notifications... #4 Check Notifications [~4 min] Your app has pending notifications, and you want to check them. Please demonstrate how you would do it. Follow-up questions: • What do you think could be done to make the experience work better for you? • How do you feel about the classification of notifications? • What do you expect to see on messages? Metrics (1 = strongly disagree, 7 = strongly agree): • What I just saw is understandable • What I just saw is valuable • What I just saw is trustworthy • What I just saw help me to make decisions faster • I am satisfied with what I just saw • Performing the task is intuitive 4. Wrap-Up [~2 min] Thank you for taking the time to walk me through those tasks. Two more questions about your overall experience: • How does this app compare against other apps you have used for booking hotels? • How would you describe your experience with the overall flow of steps throughout the session? Thank you so much for answering all those questions. That's all I have for today. Is there anything you'd like to add that we didn't cover? Do you have any questions before we wrap up? We will be wrapping up the study soon and will be processing incentives in 1–2 weeks.

Sample 4 — RallyUp — Discussion Guide

Discussion Guide – Formative Research Last Updated: December 21, 2021 Discussion Guide: Formative Research – Donor Experience Study: RallyUp – Fundraising Platform Duration: 60 minutes Methodology: Moderated Remote Interview + Usability Test 1. Introduction & Consent [~3 min] Hello, [Participant Name]! How are you? Thank you for participating in our study. I'm [Grace] and I'm a researcher working with a team that's building fundraising platforms. We want to understand what an ideal experience looks like to you. I have a colleague on the call with me today as well — they will be taking notes in

the background so I can stay focused on our conversation. The session will be roughly 60 minutes, split into two parts: first a conversation to understand your experience with fundraisers, then an activity where I'll ask you to complete a few tasks and share your feedback. I'll be sharing my window and granting you remote control for that portion, so you don't need to worry about anything on your end. There are no right or wrong answers — we're here to learn from your real experiences. Everything you share will be anonymous, and any attribution will never be shared outside the team involved with this project. We record all sessions for internal note-taking purposes only. Do you have any questions before we begin? Shall I start the recording now? [Start recording]

2. Participant Background / Warm-Up [~5 min] I would love to start off getting to know you a little more! • Could you briefly introduce yourself and share a little bit about fundraisers that you've donated to in the past? ◦ Were any of these virtual live events? 3. Core Discussion

3A. Donor Journey [~25 min] Thank you for giving me that context. I would like to understand the big picture view of how you approach fundraisers, from the initial discovery or interest through the end of your journey. • You mentioned [earlier that you donated to / in the questionnaire that the last fundraising event you donated to was ____]. Could you walk me through that journey from the very beginning? ◦ What sparked your initial interest? ◦ How did that interest end up leading you to donate? • Tell me about your connection to the organization running that fundraiser. ◦ How long have you been affiliated with them? ◦ How did you come to know the organization was trustworthy? • Walk me through how you were interacting or involved with the fundraiser. ◦ How did you know when it was going to start? ◦ How did you participate during the fundraiser? ◦ What was that experience like for you? • Tell me about when you felt done engaging with the fundraiser and why. Based on what you've shared about that journey, I'd love to understand more about how you made the decision to donate to this specific fundraiser... • You mentioned [answer from earlier]. Walk me through your decision-making process from the point where you learned about the fundraiser to actually donating. ◦ How did you decide on that specific fundraiser? ◦ Did you consider any similar fundraisers at the same time? ◦ [If yes] What compelled you to select the one you did? ◦ [If no] If there was a similar fundraiser, what do you think could make you choose one over the other? • What information do you need to know before participating in a fundraiser? ◦ Does the information you need change depending on the type of fundraiser? ◦ Is there information you often feel is missing? Based on what you've shared about your decision-making, I'd love to hear about a fundraiser experience that really stood out to you... • Think back to the online fundraisers you've donated to. Tell me about one that stands out because it was the best experience. ◦ What areas of the journey do you think they excelled in? ◦ What are the most common frustrations you've encountered across the fundraisers you've donated to? • [If applicable] You mentioned an in-person event that transitioned online. What would your ideal experience for that event

look like? Thank you for sharing all of that. Based on what you've shared, I'd love to transition to the exercise I mentioned earlier, where I'll have you interact with a live fundraising platform... 3B. Platform Tasks [~27 min] We've been looking at a few different fundraising platforms and I have a link to one of them. A few things to keep in mind before we start: • Think out loud as much as you can — share anything that's in your head. • It is possible to time out on a task, but that's solely to keep the session moving. If you're unable to complete it, just verbally share what you expected to be able to do. • I won't be able to help you through the task, because we want to see your honest reaction. • I have a dummy credit card number and address for you to use — sending over Zoom now. [Credit card (Sample): To be added] For the following two tasks, imagine that you are an avid supporter of Helping Hands, an organization striving to provide for the essential needs of children. You've just been informed of their new online fundraising campaign, the Drink Life Fund. Event Link: <https://demo.rallyup.com/668975/Campaign/Details> • Before you click anything, do you mind scrolling through the screen and talking me through what you think you're looking at? ◦ Is there any information that you need to see or would like to see that isn't included? • [Navigation] When you click on the label that says "tickets," what do you expect to happen? Task 1: Purchasing a Ticket [~8 min] You decided that you would like to purchase a general admission ticket for the live event. Could you please verbally explain what steps you think you will need to take? Now, please show me how you would purchase a general admission ticket. (Timeout: 5 minutes) Task 2: Raffle and Auction [~15 min] Helping Hands is running a raffle and auction for the Drink Life Fund, and you would like to purchase 10 tickets for a raffle prize and also place a bid in the auction that they're hosting. Could you talk me through what steps you would expect to take? Please show me how you would purchase tickets for the raffle and place a bid on one of the auction items. (Timeout: 8 minutes) • What do you think worked or didn't work about the different transaction processes you just completed? ◦ Was anything surprising? ◦ What would you have expected to be different? One last activity before we wrap up — based on what you've experienced, I'd love to get your reaction to two versions of the same campaign... Concept Comparison [~4 min] Option A: UNICEF Mockup: https://www.figma.com/proto/DrOKmqEqWDnKR0hUrUycma/MockUp_UNICEF?node-id=2%3A1975&scaling=min-zoom&page-id=0%3A1 Option B: RallyUp Mockup: https://www.figma.com/proto/DrOKmqEqWDnKR0hUrUycma/MockUp_UNICEF?node-id=56%3A6270&scaling=scale-down-width&page-id=8%3A4657 • Could you take a moment to look at both options and tell me what each of them makes you feel? ◦ Is there one that you find more trustworthy? If so, why? 4. Wrap-Up [~3 min] We're coming to the end of our session. Before we wrap up: • Is there anything we haven't covered that you think is important? • Any final thoughts you'd like to share? Thank you so much for your time and insights today. Your feedback is incredibly valuable as we continue our work.

Would you be interested in being contacted for future studies? May we keep your name and email on file so we can reach out if we have future studies that would be a good fit? • [If yes] Would email be the best way to contact you? [participant email] If we have any questions we missed today, may we reach out to you via email? We will be processing incentives within 1–2 weeks. Thank you again!

Sample 5 — RallyUp — Discussion Guide

Discussion Guide – Concept Validation Last Updated: Dec 22, 2021 Discussion Guide: Concept Validation – Organizer Experience Study: RallyUp – Fundraising Platform Duration: 60 minutes Methodology: Moderated Concept Validation (Interview + Prototype Feedback)

1. Introduction & Consent [~5 min] Hi, [Participant Name]! How are you today? Thank you so much for participating in our study. My name is [Researcher Name] and I’m a researcher currently working with the RallyUp team on a new design initiative. I have a colleague on the call with me today as well — they will be taking notes in the background so I can stay focused on our conversation. Today’s session will last about 60 minutes. There are no right or wrong answers — we’re here to learn from your real experiences. Everything you share will be anonymous, and any attribution will never be shared outside the team involved with this project. We record all sessions for internal note-taking purposes only. Do you have any questions before we begin? Shall I start the recording now? [Start recording]

2. Participant Background / Warm-Up [~5 min] To start, I’d love to learn a bit more about you and your work.

- Could you briefly introduce yourself and share a bit about your role as a fundraising organizer?
- How long have you been running fundraising campaigns?
- What kinds of campaigns do you typically organize?
- What does a typical campaign setup look like for you — from start to finish?
- Do you usually work alone or with a team?

3. Core Discussion

3A. Ideal Organizer Journey [~25 min] For this first activity, I’ll ask you to walk through everything you’d expect to do as an organizer, from when you’re creating a fundraising experience to checking on how the campaign is performing. Feel free to pause, interrupt me, or revise the flow as we go. I’ll also ask some specific questions along the way. Before I turn it over to you, here is an example. If I was walking through my ideal Netflix watching experience:

- I start off by typing in the URL in Chrome and it signs me in automatically.
- I can clearly see the shows I’ve been watching, what’s trending, and what’s recommended for me.
- One of the trending shows catches my eye but I don’t have time to get invested in a 10-episode series, so I add it to My List for later.
- I pick up where I left off on the last show I’ve been watching. Let’s say you’ve already logged in and want to set up a new

campaign. Walk me through what you'd expect from there. • What do you expect to see after logging in? ◦ How or where do you expect to set up a new campaign from here? • Walk me through the process of setting up a campaign. ◦ Do you work alone or with other members of your team? ◦ [Teammates] In what ways do you collaborate with your teammates? ◦ [Alone] If there was an option to collaborate with them, how would you like to do it? ◦ What would your ideal collaboration experience for experience creation look like? • What would you expect to do inside vs. outside of the platform? • Tell me about how you measure the performance of your campaign. ◦ Where would you find this information? ◦ What information do you need to see? ◦ What information is most important? ◦ What information is underserved or not served? ◦ What actions would you take based on what you see? • What do you consider success for a campaign? • Tell me about how you capture donor sentiment, if at all. ◦ How do you measure it? ◦ What do you do with that information? • Tell me about how you segment your donors, if you do. ◦ What segments do you use? ◦ How is that information used? What actions are taken? • What information do you need to create an engagement strategy? Thanks so much for walking me through that ideal experience. It's incredibly helpful. Now, based on what you've shared about how you run campaigns, I'd love to move to the second part of our session — sharing some early mockups and getting your reactions... 3B. Task 1 – Creation Experience (Version A) [~12 min] [Link to Figma Prototype for Task 1] Remind participant: this is a conceptual mockup, not the final design. Task: Create a multi-day fundraising experience that includes an auction and a Sweepstakes using a template. • What are your initial thoughts on what you're seeing? • If you had to change the banner/hero image, how would you do that? • If you had to change the experience title, how would you do that? • If you had to add an auction item, where would you go? • If you wanted to change the auction bidding style, where would you go? • How would you know what's left for you to do to complete setting up your fundraising experience? In general: • Is there any information that you need to see or would like to see that isn't included? • How did you feel about the overall flow of steps? • What do you think could be done to make the experience easier? Based on what you've shared about setting up the experience, let's move forward to a scenario where it's already been live for a few weeks... 3C. Task 2 – Management / Monitoring Experience [~10 min] [Link to Figma Prototype for Task 2] Remind participant: this is a conceptual mockup, not the final design. Scenario: It's been a few weeks since you launched this fundraising campaign. • What are your initial thoughts on what you're seeing? • Where would you go to see how the campaign is doing? • How do you think your fundraising experience is doing? What makes you think that? • What kind of donor information can you find here? • Find the main drop-off point that is preventing potential donors from converting (making a donation). • How easy or challenging was it to find the information you needed? • Is there any information that you need to see or would like to see that isn't included? • What do you

think could be done to make it easier to find the drop-off point? Based on what you found about where donors are dropping off, let's explore what you'd do to re-engage them... 3D. Task 3 – Donor Engagement [~10 min] [Link to Figma Prototype for Task 3] Remind participant: this is a conceptual mockup, not the final design. Task: Send a personalized message and reach out to potential donors that dropped off at the main drop-off point. • What are your initial thoughts on what you're seeing? • How easy or challenging was it to find the information you needed? • Is there any information that you need to see or would like to see that isn't included? • What do you think could be done to make it easier to send a targeted message? • Would you please take a look at the Donor Engagement tab and let me know what you think about it? • How do you feel about seeing this? 4. Wrap-Up [~5 min] We're coming to the end of our session. Before we wrap up: • Is there anything we haven't covered that you think is important? • Any final thoughts you'd like to share? Thank you so much for your time and insights today. Your feedback is incredibly valuable as we continue our work. Would you be interested in being contacted for future studies? May we keep your name and email on file so we can reach out if we have future studies that would be a good fit? • [If yes] Would email be the best way to contact you? [participant email] If we have any questions we missed today, may we reach out to you via email? We will be processing incentives within 1–2 weeks. Thank you again!

Guidelines

- Each example must include all 4 structural sections (Introduction & Consent, Participant Background / Warm-Up, Core Discussion, Wrap-Up)
- Show different session durations and time allocations across examples
- Demonstrate probing prompts throughout all examples
- Show section transitions that reference previous topics
- Include at least one example with stimulus / prototype testing
- Demonstrate user-type-specific language and question framing
- Together cover consumer research, enterprise / professional research, and mixed-method research

Runtime Rule

- Use these examples as quality calibration references.

- Learn structure, flow, pacing, and interviewing quality patterns.
- Do not copy client-specific wording.
- Adapt outputs to the current Research Plan, preserve originality, and match the gold-standard quality bar.
